Now there is finally a tool for picking up pinecones and much, much more! CONEIVORE® allows you to pick up many things quickly and easily without bending over. The Coneivore holds about 18 to 20 cones, and is able to pick up items generally 2" to 7" in diameter. The Coneivore is durable, lightweight and easy to use; push the Coneivore down over the pinecone and repeat until full. To empty the Coneivore turn it upside down, the cones easily fall out. Customers are using the CONEIVORE to pick up not only pinecones but also apples, black walnuts, tennis balls, golf balls, sweet gum balls, crab apples, Magnolia pods, hickory nuts, soft balls, base balls, toys, and more!

From: *Web Thompson*, V.P. Sales

As we begin our 33rd lawn and garden season, we are pleased to announce our most recent acquisition: the Coneivore.

Coneivore offers retailers the opportunity to market a unique, highly effective pick up tool, while enjoying the brand awareness of Garden Weasel and coneivore.com.

We look forward to your participation in our program!

Best regards always,

Web Thompson
