"It's great that we could sign Jim and Liz Feeney to put GardenGlide into the Garden Weasel product mix. GardenGlide is a low cost alternative to the wheelbarrow. I use it frequently to move mulch, plants, firewood, coolers... all kinds of stuff, in my own yard. And it takes up almost no storage space in my crowded garage!" - Webster Thompson, Vice-President of Garden Weasel.

February 10, 2009

When you're beginning the difficult task of bringing your invention to market, there are countless big and little decisions to be made that could have a lasting effect on your chances of success. One very good decision we made last May was to show our GardenGlide at the Inventors Spotlight in the National Hardware Show in Las Vegas. It was really very exciting, and a great opportunity to meet and share experiences with other new inventor/entrepreneurs. More importantly, we were able to demonstrate the GardenGlide to over a hundred Garden and Hardware industry professionals who came by our booth, where it was very well received.

At the show we were most fortunate to meet Steve Pope, Web Thompson and Ben Stark of Faultless / Bon Ami / Garden Weasel. Over the ensuing months, we've talked with them often about their new product program, their commitment to the Mission of UIA, and our mutual enthusiasm for the GardenGlide. And now we've made another big decision, to enter into a marketing agreement with them. All in all, a very good return on our trip to the NHS show!

Liz and Jim Feeney
